

Estimated Coil Weight Information Per Inch of Width

Coil O.D.	Coil I.D.				
	16"	18"	20"	22"	24"
30"	140	125	110	90	70
34"	200	185	165	150	130
36"	225	210	195	175	160
38"	260	248	230	210	192
40"	290	275	260	240	220
42"	332	315	300	280	260
48"	450	435	420	400	380
50"	485	470	450	435	415
54"	594	580	560	545	525
60"	745	730	710	700	675
66"	900	885	870	850	830
72"	1065	1,050	1,030	1,010	990

Usage:

Locate your Coil I.D. & Coil O.D. on the chart above.

Use the corresponding number in the following formula:

$$\begin{array}{rcccl}
 \text{Weight} & & \text{Width} & & \text{Total Weight} \\
 \text{from} & \times & \text{of} & = & \text{of Coil} \\
 \text{Chart} & & \text{Coil} & & \text{(Mild Steel)}
 \end{array}$$

To Obtain Weight of:

Aluminum Multiply Total Weight by 0.344

Brass Multiply Total Weight by 1.080

Copper Multiply Total Weight by 1.140

Stainless Steel Multiply Total Weight by 1.020
